How does a client benefit from TT's services?

Better Quality

- Technology, Expertise and Tools in V & V and QA
 - Expertise in different application domains
 - Independent, Unbiased V & V house

Faster Turnaround

- Parallel work on V & V expedites software delivery
- Experienced test teams reduce the actual time needed to develop test cases and conduct testing
 - 24 X 7 testing

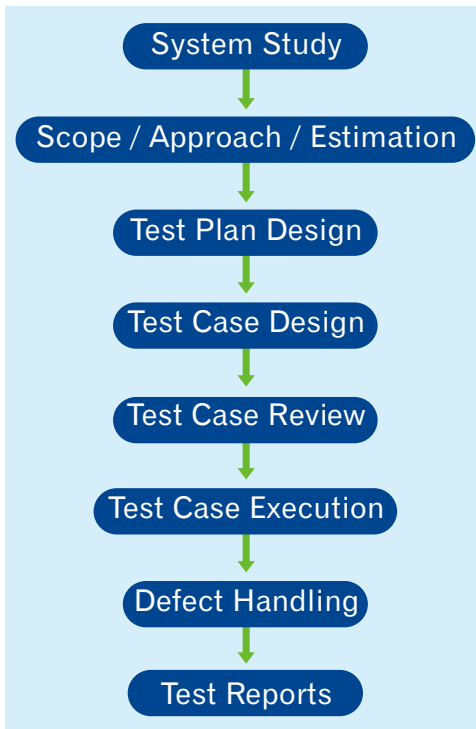

Lower Costs

- Better testing reduces rework
- Combination of onsite and offsite work reduces project costs

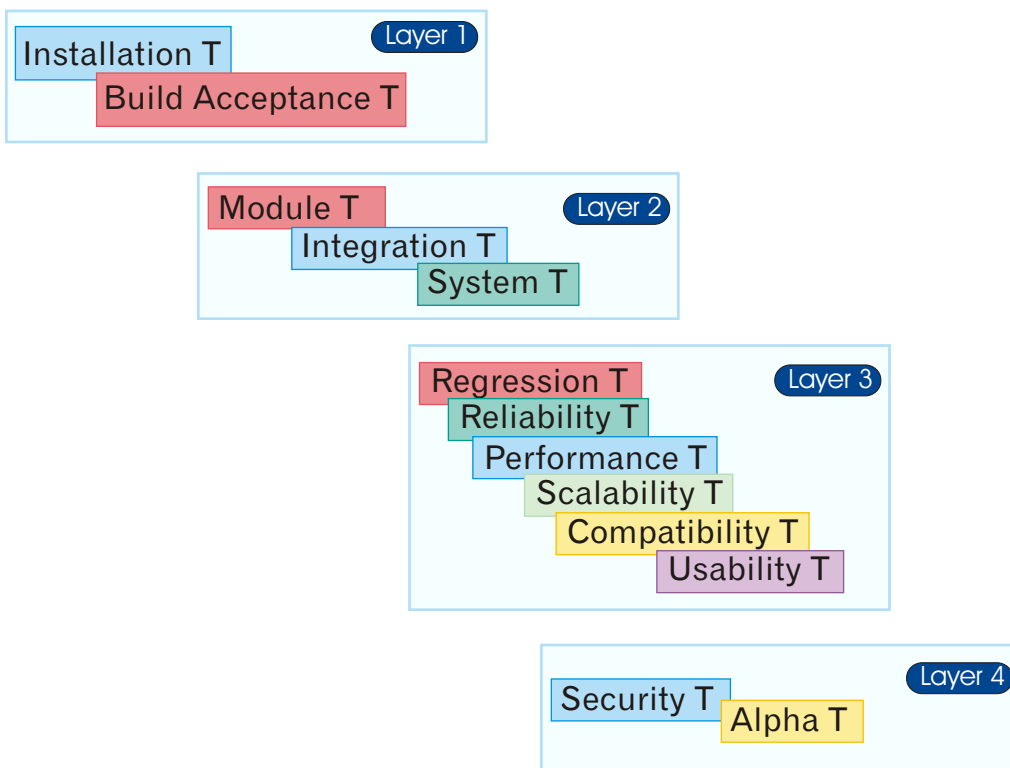

Thatavarti's Approach:

Test Life Cycle (TLC):

Thatavarti tests the software against specifications. Thatavarti develops test plans and generates test cases using formal methods to ensure high functional coverage. Where project demands Thatavarti will automate testing. We then test the software, report defects and put it through as many regression test cycles as needed to achieve desired quality.

4-Layered Product Testing Architecture:

Thatavarti's Expertise:

Domain 6

Banking
Finance
Insurance
Manufacturing
Telecom
Health care

Our Work Force:

The engine that drives our growth

Powered by a strong team of top-notch professionals, TT services its global clients through its offices in US, UK and India. The core of our team is a group of seasoned functional experts with hands on experience in the QA and Software testing domains. We possess the right mix of experience, knowledge and skills. All the QA and Testing resources we recruit are handpicked through a rigorous selection process and subsequently put through an intensive training program to ensure that they are best-of-breed and fully meet the required standards. Our specialists have the knowledge and experience to provide the outsourced software testing and quality assurance services which your company needs to achieve success. TT's highly qualified team, utilization of proven methodology / tools and success in numerous projects for worldwide leaders in the IT allows us to present the best software testing solutions in the industry.

Quality

a reflection of our commitment to customer delight

Quality has always been integral to TT. We are committed to customer needs and strive to benchmark our performance to international standards of excellence. Our strength lies in the ability to clearly understand project objectives and to implement them with absolute discipline and consistency. At TT, all customer products pass through extensive testing and re-testing to ensure maximum quality and consistency through all phases of the project. We focus on delivering value addition through superior and cost-effective services. TT is proud of the fact that it has created a benchmark in the testing service industry for process efficiency and service excellence.
